ALL WEATHER MOLDED ONE-PIECE FIBERGLASS COMPOSITE BUILDINGS

High quality fiberglass composite buildings designed for all-weather, year-round protection of your equipment and/or instrumentation.
Corrosion resistant materials of construction for long life.
Molded one-piece construction for high strength and low cost.
Virtually maintenance free.

Insulated to reduce heating/cooling costs.
Light weight for easy installation.
Numerous sizes and optional equipment items are available to meet your requirements.
Fast delivery on many sizes.
APPLICATIONS

EFC all-weather, molded one-piece fiberglass reinforced polyester buildings are well suited to house and protect equipment for a wide variety of applications such as:

- Chlorination and dechlorination systems
- Chemical and polymer feed systems
- Analyzer equipment
- Sampling equipment
- Pollution monitoring equipment
- Electronic and communications equipment
- Marine and fire fighting equipment
- Pumps, motors and generators

CONSTRUCTION

EFC all-weather, molded one-piece fiberglass reinforced polyester buildings are fabricated of composite construction consisting of:

- Smooth white U.V. resistant gelcoat finish (15-20 mil thick) on exterior surface.
- Minimum 1/8" thick fiberglass reinforced polyester laminate (minimum 30% glass content by weight) on exterior surface.
- 1" thick polyisocyanurate rigid foam insulation, closed cell type, 2.04/cu. ft. density, having an R-value of 6.0.
- Minimum 1/16" thick fiberglass reinforced polyester laminate (minimum 30% glass content by weight) on interior surface.
- White U.V. resistant gelcoat finish (15-20 mil thick) on interior surface.

CHARACTERISTICS

EFC all-weather, molded one-piece fiberglass reinforced polyester buildings have the following characteristics:

- Insulated composite construction
- Economical
- Corrosion resistant
- Rugged
- U.V. resistant
- Light weight
- Virtually maintenance free
- Easy installation

STANDARD FEATURES/EQUIPMENT

- Peaked roof with two (2) cadmium plated lifting eyes.
- Single door (for models #EFC-72x___-1 and #EFC-54x___-1), insulated composite construction, flush-fitting, 36" wide X 78" high (O.I.C.) see door construction/hardware.
- Double doors (for model #EFC-72x___-2), insulated composite construction, flush-fitting, 63" wide X 78" high (O.I.C.) - see door construction/hardware.
- White color molded-in (painting not required).
- Insulated with 1" thick polyisocyanurate rigid foam.
- Internal 4" wide X 1/4" thick integral fiberglass base mounting flange, predrilled for 1/2" diameter anchor bolts.
- Closed cell neoprene rubber base mounting gasket.
- Designed to withstand 120 MPH wind load and 30 PSF snow load.

DOOR CONSTRUCTION/HARDWARE

- Door is fabricated of molded one-piece composite construction (similar to walls and roof) with 1 1/2" thick, polyisocyanurate foam insulation.
- Standard single door (for models #EFC-72x___-1 and #EFC-54x___-1) is 36" wide X 78" high (O.I.C.).
- Standard set of double doors (for model #EFC-72x___-2) are 63" wide X 78" high (O.I.C.).
- Door frame is integrally molded within front wall.
- Standard door hardware consists of:
  - Continuous stainless steel piano hinge
  - Plated safety stop (crash) chain
  - Stainless steel cylindrical lockset
  - Plated surface bolts, 8" long (for model #EFC-72x___-2)
  - Stainless steel astragal (for model #EFC-72x___-2)
  - Neoprene sponge rubber gasket (weather-stripping)
  - Neoprene rubber base wiper gasket
  - Non-corrosive fasteners

LEGEND

A. EXTERIOR FRP LAMINATE WITH GELCOAT FINISH, MIN. 1/8" THICK.
B. 1" THICK POLYISOCYANURATE FOAM INSULATION IN WALLS & CEILING.
C. INTERIOR FRP LAMINATE WITH GELCOAT FINISH, MIN. 1/16" THICK.
D. INTEGRAL FRP DOOR FRAME.
E. NEOPRENE SPONGE RUBBER GASKET (WEATHER-STRIPPING).
F. CONTINUOUS STAINLESS STEEL PIANO HINGE.
G. PLATED SURFACE BOLT (8" LONG) FOR PASSIVE DOOR.
H. ST. STEEL ASTRAGAL (1-Z-BAR STYLE) FOR PASSIVE DOOR.

**Notes:**
1. Above sizes are overall exterior dimensions.
2. Depth dimension is available in nonstandard sizes.
3. Standard overall wall thickness is 1 1/4".
4. Standard eave height is 7'-6".

**ORDERING INFORMATION**

When ordering please provide the following information:

Model # and size of building.
Color of building.
Door swing (for models EFC-72x-1 and EFC-54x-1).
Active/passive door position (for model EFC-72x-2).
Optional equipment items - please furnish drawing detailing locations.

If your building was quoted direct by EFC please advise quotation number. This will greatly reduce the amount of information required during order placement.
OPTIONAL EQUIPMENT
Color other than standard white on exterior
Increased insulation thickness (up to 2")
Flame resistant construction
Insulated fiberglass floor
Wall partition
Additional doors
Panic hardware (replaces standard lockset)
Door closer (replaces standard stop chain)
Door window (12" x 12" lexan is standard)
Fixed or sliding wall windows
Lighting - incandescent or fluorescent & HPS, etc.
Exhaust fan (CFM as required) with shutter and a fiberglass canopy with insect screen
Air intake vent (size as required) - manually adjustable, automatic or motorized, with a fiberglass canopy with insect screen
Control switches:
  - Toggle switch - interior or exterior
  - Door activated micro (limit) switch
  - Remote thermostat
Heater with built-in thermostat (wattage as required)
Air conditioner (BTU's as required)
Duplex outlet receptacle - interior or exterior
Circuit breaker load center with branch breakers (amps, type, size, etc., as required)
Wiring in rigid schedule 40 PVC conduit (or as required)
Fiberglass shelving
Mounting channel
Reinforcement in wall or ceiling
Cut-out opening in wall or ceiling
Stainless steel lifting eyes
Stainless steel anchor bolts
Explosion proof electrical equipment
Other equipment as required
See drawing #EFC-

SAMPLE SPECIFICATIONS
A molded one-piece fiberglass building shall be supplied and installed to house the _______ as shown on the specification drawings.

The building size shall be _______ wide x ______ deep x 7'-6" high overall 7'-0" high at eaves. Roof to be peaked and be provided with two cadmium plated lifting eyes.

Building shall be of fiberglass composite construction. Exterior surface shall have a smooth white U.V. resistant gelcoat finish. Overall fiberglass laminate for exterior surface to be a minimum of 1/8" thick. Building shall be insulated with 1" thick polyisocyanurate rigid foam having an R-value of 6.0.

Building shall include a 36" wide x 78" high flush-fitting single door (or 63" wide x 78" high set of double doors - for model #EFC-72x___-2 only). Door(s) to be of fiberglass composite construction, be mounted within an integral fiberglass frame, be provided with neoprene gasket (weather-stripping) and non-corrosive hardware - see door construction/hardware.

Building shall be supplied with an integral fiberglass base mounting flange, 4" wide X 1 1/4" thick, integral with walls, predrilled for 1/2" diameter anchor bolts (anchor bolts to be supplied and installed by contractor). Closed cell neoprene rubber base mounting gasket shall be furnished to seal building to foundation.

Optional equipment to include:

Building shall be model #EFC-____x____ as manufactured by Engineered Fiberglass Composites Inc., New Lisbon, WI.
